ARRK Research & Development SRL

The company

10 years' experience in automotive product development

ARRK Research & Development SRL is an essential part of the internationally active ARRK Engineering Division. The Romanian headquarters were founded in 2007 and are based in the heart of Cluj-Napoca, in the immediate vicinity of the city center at ICPIAF building. With ten years business experience and the expertise of almost 200 engineers, ARRK Research & Development has established as an important constant within the Engineering Division of the global ARRK Group. The focus of services is on providing support to product development projects in the areas Design, CAE & Simulation, Test & Validation and Electric & Electronics mainly for customers from the automotive industry. The projects are carried out in close cooperation with the parent company P+Z Engineering GmbH in Germany.
